HOW TO CONTACT US

What is the STCW Code

The STCW (International Convention on Standards of Training, Certification and Watchkeeping for Seafarers) sets the global minimum qualification standards for masters, officers, and watchkeeping personnel on seagoing vessels and large yachts. Established in 1978 by the International Maritime Organization (IMO), the convention ensures standardised training worldwide, with key updates introduced in 1995 (STCW 95) and the 2010 Manila Amendments.

Basic Safety Training under STCW is a mandatory requirement for anyone seeking to work on commercial ships, ferries, cruise ships, or superyachts. STCW certifications are typically valid for five years, after which refresher training is required. Stream Marine Training provides both initial and refresher STCW courses, detailed within this brochure.

Who are SMT

Stream Marine Training are the UK's leading and largest maritime training provider. We are expanding our business into the renewables and oil & gas industry. Stream Marine Training Limited was incorporated on 10th January 2012 and commenced trading on 1st January 2014. The company opened its first asset, a swimming pool, in January 2014. As well as becoming accredited by the Maritime and Coast Guard Agency, the company signed a major deal with Glasgow International Airport, which gave the business a solid base on which to expand. SMT now employs a number of people and utilises multiple specialist consultants. In August 2017, SMT moved into our new 18,000-square foot premises on Glasgow Airport's East Campus and secured a seven-figure investment partner.

Basic Safety Training Course

The STCW Basic Safety Training is a mandatory programme for all seafarers working on commercial vessels. It covers four core modules — **Personal Survival Techniques, Fire Prevention and Fire Fighting, Elementary First Aid, and Personal Safety and Social Responsibilities** — with a fifth module, **Proficiency in Security Awareness**, included in our syllabus at SMT. This five-day course equips participants with the essential skills to respond effectively in emergencies and meet international legal requirements for working at sea.

Medical Care on Board Update - 3 day

Revalidation - Every 5 years

Security Courses

STCW - MCA Approved courses

Security Awareness - 1 day

Designated Security Duties - 1 day

Passenger Ship Courses

STCW - MCA Approved courses

Crisis Management & Human Behaviour - 1 day

Passenger Safety, Cargo Safety & Hull Integrity for Ro-Ro Passenger Ships - 1 day

Crowd Management Training (Non MCA - SMT only) - 0.5 day

Alternative Fuels Courses

STCW - MCA & BMA Approved courses

Basic training for service on ships using fuels covered within the IGF Code (BIGF)

- 2 day

Advanced training for service on ships using fuels covered within the IGF Code

(AIGF) - 5 day

Engine Courses

A large, blue industrial engine is the central focus of the image, situated in a complex engine room. The engine is surrounded by various pipes, hoses, and electrical conduits. In the background, a large white cylindrical component, possibly a propeller or a large fan, is visible. The overall environment is industrial and well-lit.

STCW - MCA Approved courses

Approved Engine Course Part 1 - 5 day

Approved Engine Course Part 2 - 5 day

Webinar Courses

MCA Approved

Small Workboat Stability - 1 day

Advanced Fire Fighting Update (Route 1 only) - 0.5 day

Basic IGF training (also BMA approved) - 1 day
